SHEET 1 OF 1

Tiptiptap ⁰⁰

1. Attach the metal cable to the beam of the lower structure.
2. Pull the metal cable through the tensioner on the beam of the higher structure until it barely touches the ground in the middle of the cable run
3. Attach the metal cable to the tensioner and cut off the remaining metal cable.
4. Tighten the metal cable in such a way that the next turns overlap the previous ones. In this way, a stronger connection is created between the tensioner and the metal cable.
