Tiptiptap

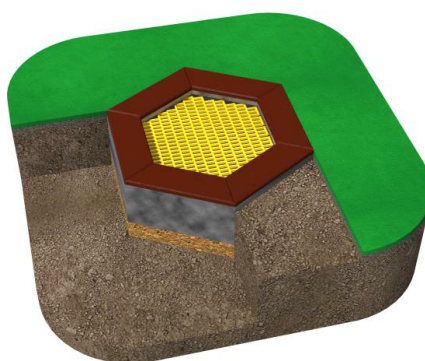

1. Trampoline is delivered as one complete piece, and it is ready for installation.

2. Trampoline is installed in the ground – foundation depth is 40cm.

3. Trampoline is mounted directly on a properly leveled, stable and water-permeable ground.

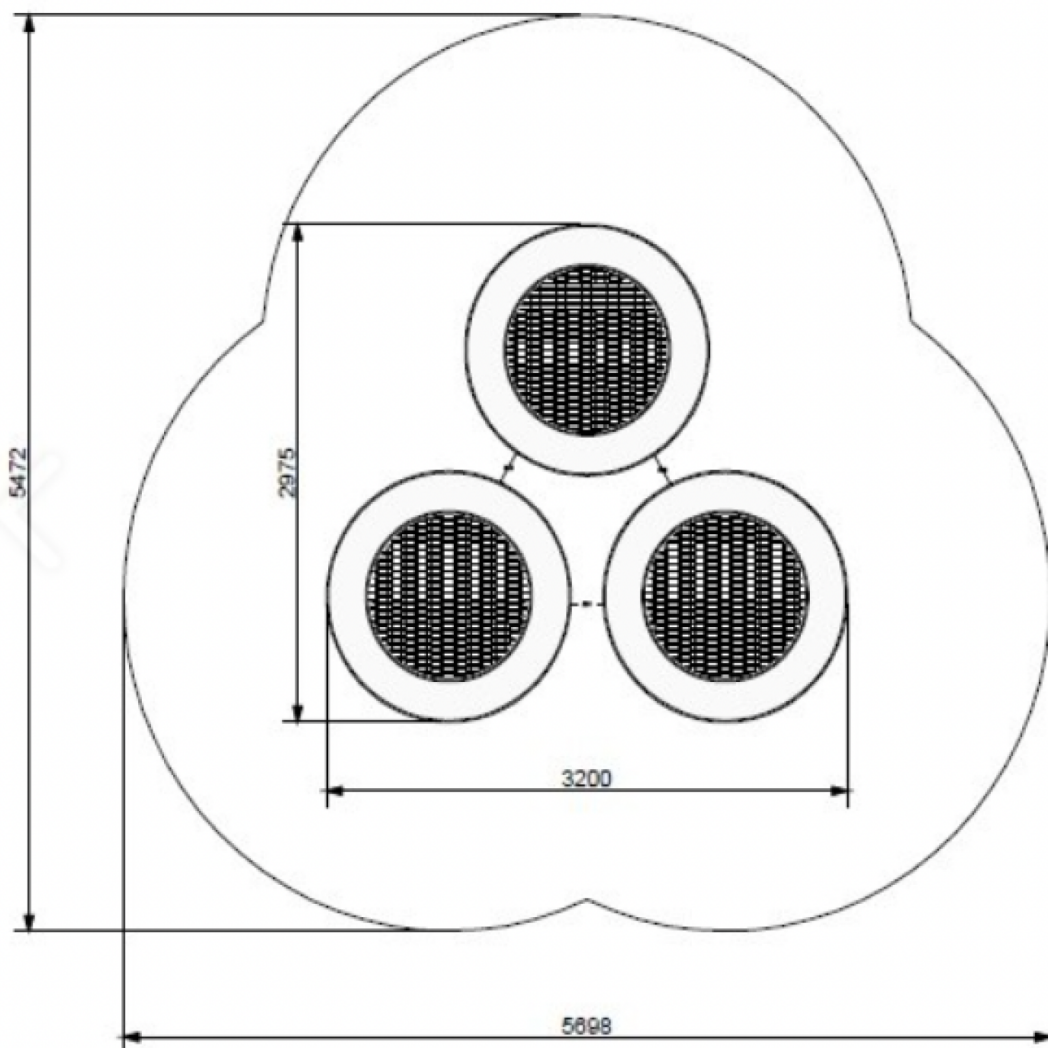

NOTE!

The width of the hole should be larger than the size of the trampoline - this will make installation easier. If the ground is not very stable or weak, we recommend strengthening it.
