Technical information

Safety area width	18.8 m
Safety area length	8 m
Width of structure	4.1 m
Length of structure	12.8 m
Height of structure	4.1 m
Max. fall height	2 m
Recommended age of children	12+

Product consists of

Beam	1 pcs
s	

Installation info

Installers	2
Installation time	8 h

The product's hot-dip galvanized round steel posts are concreted into the ground.

The product needs a safety surface

This high climbing track is designed to provide the ultimate challenge for the user's upper body strength, grip, and coordination. The obstacle consists of 6 sequential hanging rings attached to a sturdy metal frame, requiring the user to move with rhythm and agility to transition from one ring to the next without touching the ground. Its long and open design allows the obstacle to be cleared at various paces, making it an ideal element for both intense training and fun competitions on an adventure course. Thanks to its height and dynamics, this module offers an authentic "ninja" experience while developing endurance and self-confidence.

Materials:

- The rings are made of HDPE plastic, attached with a stainless steel chain;
- The structure is made of hot-dip galvanised metal.
